

CONCRETE BRIDGE DEVELOPMENT GROUP

The Sustainability Puzzle – making the pieces fit

CBDG 25th Annual Conference

National Conference Centre,
Birmingham, UK, B92 0EJ

Wednesday 29th June 2022

Call for Presentations

How does bridge engineering respond to the modern, post-carbon world?

The CBDG's 25th Annual conference will tackle the sustainability options for the design, construction, inspection and management of concrete bridges. Suggested topics for presentation include:

- the circular economy
- decarbonisation and net zero carbon
- adaptation to climate change
- modular concrete construction
- optimal structural shape and form
- digital design/construction/inspection
- design efficiencies through enhanced inspection
- case studies and project solutions

Subjects for consideration are welcome. Please provide an abstract by the 18th February 2022. This must include a title and outline content (maximum 150 words). Presentations are typically expected to be 25-35 minutes plus Q&A. Following acceptance, the presentation in PowerPoint format will be required in advance of the conference.

For further information or to send your abstract, please email: enquiries@cbdg.org.uk
